Suomi is the FINNISH name for Finland.

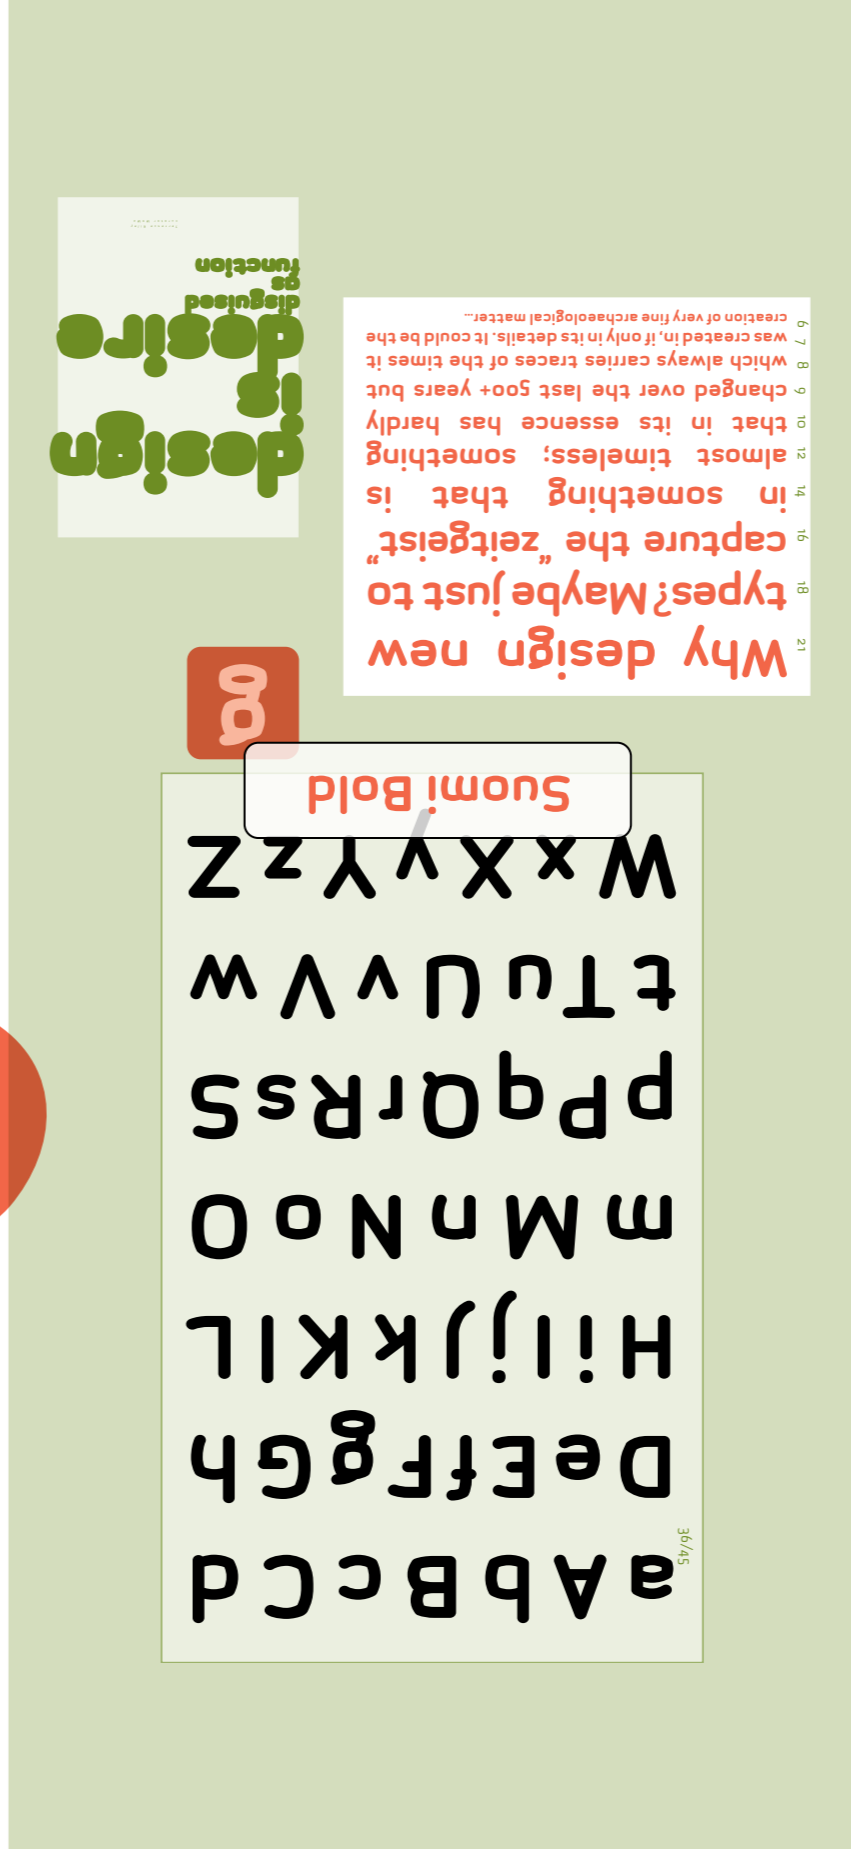

Why Suomi? Finland is a unique country with a language that has no equal either. The sheer amount of nature alone is overwhelming; three quarters of the country are covered in forest, with another ten percent consisting of lakes. The first ideas for Suomi were drafted during a visit to the country of a thousand lakes, inspired by all I encountered there; the people, the nature and the arts. Because of its northern location (between 60° and 70° latitude), its natural circumstances and the nature of the people Finland has a distinct character.

It is like bent wood furniture, which they happen to have a lot of; the chair looks quite firm and has no padding, but once you take a seat you are very very comfortable. This is exemplary for Finnish design; it seems rooted in nature, has a basic appearance and is pure in both form and use of materials. This makes for products Suomi feels at home with. Sarpaneva's glassware, Aalto's architecture, furniture and design, Nokia, Arabia & Iittala products and all the new designs... I have been told the squared-off round shape which is the base on which Suomi is built is very typical. It captures the paradox I found in Finland; severe around the edges, but relaxed at heart.

SUOMI IS DESIGNED BY DIEDERIK CORVERS AT OGENTROOST.NL. ALL FONTS ARE MANUALLY SPACED & KERNED AND CONTAIN FULL INTERNATIONAL CHARACTER SET. SOME INCLUDE STYLISTIC ALTERNATES.
